

hilight tribe

It is the dawn of a new era. Hilight Tribe is breaking new ground with their Live Natural Trance, an explosive new sound that is blowing up dance floors from Paris to Tokyo.

For ten years now, the "Tribe" has been sharing their acoustic trance music and their lifestyle that is simultaneously close to the Earth and conscious of modern technology. With their 6 albums, 4 videos and 500 concerts, Hilight Tribe are true innovators with their electro-instrumental sound which fuses guitar, bass, drum set, voice, congas, djembe, didgeridoo as well as other string and percussion instruments from all over the world.

These five musicians and their sound engineer live in between Paris, Brittany and the Balearic Islands of Spain. First and foremost they consider themselves citizens of the world in the spirit of unity between countries and cultures.

On stage the Tribe releases a high-voltage energy while creating osmosis between the audience and the musicians. They bridge the worlds between futuristic sounds and tribal cadences, activating their music with a powerful kick. Each instrument is played in real time and linked to effects creating alchemy between modern and ancestral sounds.

Precursors of a style that has become a musical trend, Hilight Tribe invites you on a trip – beyond time and space where the roots spirit guides the modern world towards the trance path...
